The Canadian Journal of Chemical Engineering — 1971

INDEX OF PAPERS

Absorption of Carbon Dioxide in Ethylenediamine Solutions 1. Absorption Kinetics and Equilibrium — R. H. Weiland, and Olev, Trass 767
Absorption of Carbon Dioxide in Ethylenediamine Solutions. II. Pilot Plant Study of Absorption and Regeneration — Olev Trass and R. H. Weiland 773
Analysis of Heat Transfer During Flow of an Air/Water Mist Across A heated Cylinder, An — I.C. Finlay 333
Application de l'équation de Wilson à l'estimation des enthalpies de mélange — J. L. Duran et S. Kaliaguine 278
Application of Numerical Hill-Climbing in Control of Systems via Liapunov's Direct Method — Howard A. Bennett and Rein Luus 685
Approximation Methods for Optimal Control Synthesis — G. A. Hicks and W. H. Ray 522
Axial Dispersion in a Tubular Flow Vessel with Bends — Chan Mo Park and Albert Gomezplata 202
Calcium Carbonate Precipitation in a Continuous Stirred Tank Reactor — A. Maruscak, C. G. J. aker and M. A. Bergougnou 819
Chemical Engineer and the Viscose Rayon Industry, The — N. I. Battista 3
Coalescence of an Emulsion in a Fibrous Bed. Part I-Theory — D. F. Sherony and R. C. Kintner 314
Coalescence of an Emulsion in a Fibrous Bed. Part II-Experimental — D. F. Sherony and R. C. Kintner 321
Compensation for Unknown Input Disturbances in Multiple-Input Identification and Optimal Control — R. G. Corlis and Rein Luus 853
Composition Dependence of Viscosity of Some Binary Solutions — R. K. Ghai and F. A. L. Dullien 260
Compressibilities of Helium-Nitrogen Mixtures — J. F. Mathews and D. C. D. Morey 282
Compressibility Factor of Sour Natural Gases — Edward Wichert and Khalid Aziz 267
Condensation on a Vertical Rotating Finned Tube — A. G. Williams, S. S. Nandapurker and F. A. Holland 51
Controlled Cycling Extraction: Part I. Performance of an Experimental Column — C. R. Darsi and J. E. Feick 95
Controlled Cycling Extraction: Part II. Mathematical Model for the Prediction of Transient and Steady-State Behavior — C. R. Darsi and J. E. Feich 101
Convergence Promotion in the Simulation of Chemical Processes with Recycle — the Dominant Eigenvalue Method — C. M. Crowe and R. Orbach 509
Correlation and Prediction of Excess Thermodynamic Properties of Normal Fluid Mixtures, On the — Shinn-Der Chang and Benjamin C.-Y. Lu 286
Correlation for Predicting Liquid Viscosities of Petroleum Fractions, A — M. M. Abbott, T. C. Kaufmann and L. Domash 379
Correlation for the Solubility of Hydrocarbons in Water, A — P. J. Leinonen, D. Mackay and C. R. Phillips 288
Coupled Transport of Heat and Mass in Laminar Tube Flow — T. S. Chen, L. M. Huang and G. A. Scheffel 477
Critical Temperature Estimation for Simple Mixtures — C. C. Li 709
Cyclic Operation of a Fixed Bed Ion Exchange Process: Experimental and Computer Simulation Studies — K. S. Tan and I. H. Spinner 252
Dense Phase Vertical Pneumatic Conveying — C. E. Capes 182
Diffusion Effects in Catalytic Gas Oil Cracking — D. A. Best, R. A. Pachovsky, and B. W. Wojciechowski 809
Diffusion of Positive Chlorine in Macroreticular Resins — Edgar J. Dewar and Morris Wayman 758
Diffusivity of Oxygen in Water — C. E. St. Denis and C. J. D. Fell 885
Direct Digital Multiplicative Control of a Double-Pipe Heat Exchanger (note) — Janis Auns and Frank D. Talbot 892
Dissolution of Copper Scrap in Hydrochloric Acid — Tyson Rigg and William Marflitt 501
Dissolution of Ferritic Stainless Steel Scrap in Hydrochloric Acid — T. Rigg and M. S. Rahaman 550
Droplet Projection Velocities for Use in Sieve Tray Spray Models — W. V. Pinczewski and C. J. D. Fell 548
Dynamics of Convection Heat Exchangers — R. A. Heidemann, C. E. Huckaba, F. S. Eisen, L. I. Weissman and G. M. Gallatig 147
Dynamics of Cyclic Fixed Bed Ion Exchange. An Analysis Based on a Linear Mass Transfer Model — K. S. Tan and I. H. Spinner 105
Dynamic Theory of Mass Transfer at a Wavy Interface, A — Richard G. Rice 241
Effect of Flow Pattern on Gas-Phase Controlled Mass Transfer — C. C. Mah and J. A. Golding 160
Effect of Liquid Maldistribution on the Performance of a Packed Tower Absorber, The — J. Stanislav G. A. Gregory 590
Effect of Surface Heterogeneity on Surface Diffusion in Microporous Solids — Y. Horiguchi, R. R. Hudgins and P. L. Silveston 76
Effect of Temperature on the Rates of Dissolution of Gibbsite and Boehmite — R. F. Scotford and J. R. Glastonbury 611
Effective Viscosity of a Turbulently Suspended Fuid-Particle Mixture, The — C. A. Shook, R. C. Bowles and G. S. Vassie 544
Evaluation of Methods for Determining the Parameters in the BWR Equation of State using Volumetric and Heat Capacity Data, An — P. R. Bishnoi and D. B. Robinson 642
Expansion of a Single Gas Bubble Rising in a Column of Liquid — K. R. Weller 154
Expansion-Contraction Behavior of Dilute Polymer Solutions — E. ilgen 732
Experimental Design for the Determination of Coefficients in Coupled Non-Symmetric First Order Systems: The Multicomponent Diaphragm Cell — George Kosanovich and Harry T. Cullinan, Jr. 753
Experimental Determination of Velocity Profiles in Smooth Falling Liquid Films, The — R. A. Cook and R. H. Clark 412
Experimental Heat Capacities of Carbon Dioxide-Methane Mixtures at Elevated Pressures — P. R. Bishnoi and D. B. Robinson 657
Experimental Investigation of Primary and Secondary Velocity for Turbulent Flow in Eccentric Annuli, An — Paul V. Tebo and Curtis W. Clump 175
Experimental Model for Visual Studies of Turbulent Flow in Porous Materials, An — C. R. Kyle and R. L. Perrine 19
Experimental Studies of Interphase Mass Transfer with Chemical Reaction — Saponification of Esters — P. Seto, A. I. Johnson, A. E. Hamielec and W. F. Further 224
Flow of "Settling" Slurries in Tubes with Internal Spiral Ribs. The — M. E. Charles, G. H.-S. Cheh and H-L. Chu 737
Flow Through Porous Media in The Presence of Sound — J. M. Beeckmans and P. Sen-Gupta 721
Fluid Velocity Profiles near the Wall of Liquid-Fluidized Beds — B. G. Allen and J. W. Smith 430
Formation of Gas Clouds in Fluidized Beds (note) — Roland Clift 876

Friction Factors for a Tube Rotating about Its Own Axis — P. H. Harvey, S. S. Nandapurkar and F. A. Holland 207
Friction Factors in Pulsed Turbulent Flow — M. H. I. Baird, G. F. Round and J. N. Cardenas 200
Further Studies on Momentum Dissipation of Grid Jets in a Gas Fluidized Bed — L. A. Behie, M. A. Bergougnou, C. G. J. Baker and T. E. Base 557
Gas Holdup in a Bubble Column Containing Organic Liquid Mixtures — D. Bhaga, B. B. Pruden and M. E. Weber 417
General Analytical Solutions for First and Second Order, Homogeneous, Irreversible Reactions in Ideal Tubular Reactors — S. N. Lo and A. Cholette 621
General Mathematical Models of Transport Processes with and without Chemical Reactions — Benjamin T. F. Chung, L. T. Fan and C. L. Hwang 340
Heat and Mass Transfer During Air Drying of Solids — J. J. Bimbinet, M. Loncin and H. Brusset 860
Heat and Mass Transfer in Spouted Beds — a review — Kishan B. Mathur and Norman Epstein 467
Heat Transfer from a Turbulent Hot Air Jet Impinging Normally on a Flat Plate — John Vlachopoulos and John F. Tomich 462
Heat Transfer in the Cooling of Thermoplastic Melts under Pressure — S. Kenig and M. R. Kamal 210
Heats of Mixing for Homologous Series of Ketones and their Prediction from Group Interaction Theory and the Congruence Principle — R. S. Ramalho, J. L. Tillie and S. Kaliaguine 830
High Pressure Autocollimating Refractometer for Determining Coexisting Liquid and Vapor Phase Densities, A. — G. J. Besserer and D. B. Robinson 651
Improved Parametric Characterization of Flow Geometries — William Kozicki and Carlos Tiu 562
Improved Waterflooding through Mobility Control — — N. Mungan 32
Incluence du molybdène sur la cinétique des réactions de conversion du méthane en présence de H_2O et CO_2 — J. Vanderschuren et S. Kaliaguine 495
Influence d'une agitation rotative sur le fonctionnement d'une colonne pulsée d'extraction — S. Subhasavasdikul, C. Alran, L. Boyadzhiev and H. Angelino 88
Influence of Water on the Rhythmic Process of Precipitation of Ammonium Chloride formed by the Counterdiffusion of Ammonia and Hydrogen Chloride, The — G. A. Davies, A. B. Ponter and S. Singh 71
Internal Age and Residence Time Distributions of a Fluid in Non-Ideal Stirred Tanks in Series — David Chiang and A. Cholette 484
Interpretation of Chromatographic Peaks by Fourier Analysis — S. K. Gangwal, R. R. Hudgins, A. W. Bryson and P. L. Silveston 113
Investigation of the Viscosity of Dry Air at Elevated Pressures and Temperatures using a Steady-Flow Capillary Viscosimeter, An — G. E. Goring and D. P. Eagan 25
Kinetic Analysis Utilizing a Recirculating Flow Reactor System — F. T. Osborne, D. C. Martin V. T. Stannett, and E. P. Stahel 813
Kinetics of Titanium Dioxide Agglomeration in an Agitated Liquid Suspension. The — E. F. Wuhl, and C. G. J. Baker 742
Laminar Film Boiling on a Porous Vertical Wall with Uniform Suction Velocity — M. V. Krishnamurthy and R. Ramachandran 458
Laminar-Flow Non-Newtonian Heat Transfer in Flattened Tubes — D. R. Oliver and R. B. Karim 236
Large Scale Process Optimization Techniques Applied to Chemical and Petroleum Processes — B. S. Jung, W. Mirosh, and W. H. Ray 844
Laser Interferometric Method for Electron Concentration Measurements in Stabilized Plasmas. A. — Paul Meubus and Marc Fortin 797
L'effet du molybdène sur l'oxydation partielle du méthane par l'oxygène-pur — L. P. Blanchard and Yoeun Yim 488
Longitudinal Mixing of the Liquid Phase in Packed Columns with Countercurrent Two Phase Flow — Pham Co, and R. Bibaud 727
Mass Transfer in Liquid-Liquid (Horizontal) Pipeline Contactors — A. K. Shah and M. M. Sharma 596
Mass Transfer into a Horizontal Layer of Stagnant Liquid under the Action of Instabilities — E. Ruckenstein 62
Mass Transfer with Fast Chemical Reaction in Drops — G. Tyroler, A. E. Hamielec, A. I. Johnson and B. P. LeClair 56
Mathematical Modeling of a Modified Scheibel Liquid-Liquid Extraction Column in the Frequency Domain — K. H. Pang and A. I. Johnson 837
Measurement of Liquid Phase Diffusivities for Slightly Soluble Solids, On the — A. A. Pradhan and W. J. Heideger 10
Measurement of Yield Stress of Fluid-Like Viscoplastic Substances — Jaroslav J. Vocadlo and Michael E. Charles 576
Measurement of Zeolitic Diffusion Coefficients, On the — K. F. Loughlin, D. M. Ruthven and R. I. Derrah 66
Minimum Power Requirements for Emulsification of Two-Phase, Liquid Systems. On. (Communication) — D. D. Esch, P. J. D'Angelo, and R. W. Pike 872
Minimum Time Operating Policy for a Liquid-Liquid Extraction Column, A — K. H. Pang and A. I. Johnson 529
Misinterpretation of Shrinking Core Date in Chemical Reactions (note) — J. H. owen 882
Model for Velocity and Eddy Diffusivity Distributions in Fully Turbulent Pipe Flow, A — J. R. Travis, H. O. Buhr and Alexander Seconske 14
Modeling and Parametric Studies of a Vapor Recompression Distillation System — M. A. Menzies and A. I. Johnson 407
Motion of Entrained Particles in Gas Streams — R. Clift and W. H. Gauvin 439
Nonfilmwise Condensation of Binary Vapors: Mechanism and Droplet Sizes — J. D. Ford and J. E. McAleer 157
Non-Ideal Flow Parameters for Viscous Fluids Flowing Through Stirred Tanks — M. Moo-Young and K. W. Chan 187
On the Motion of Gas Bubbles in a Viscoelastic Liquid — L. G. Leal, J. Skoog and A. Acrivos 569
Optimal Control of Linear and Nonlinear Systems by Two-Level Optimization Systems — Grant E. Robertson, David J. Hawkins and Rein Luus 677
Optimal Operating Policy for a Liquid-Liquid Extraction Column, An — A. I. Johnson and K. H. Pang 398
Optimal Operation of a Batch Packed Distillation Column — F. M. Keith and J. Brunet 291
Optimal Switching Policies for Fixed Bed Catalytic Reactors in Series — G. N. Miertschin and R. Jackson 514
Optimisation d'un réacteur multiétagé d'oxydation de l'anhydride sulfureux au moyen de trois méthodes directes (Hooke et Jeeves, Rosenbrock, simplex). H. Brusset, D. Depeyre, M. Boedo, R. Melkior et J. L. Staedtsbaeder 786
Optimization of Reactors with Catalyst Decay. III — Tubular Reactor with Several Beds of Uniform Temperature — C. M. Crowe and S. I. Lee 385
Optimum Orientation of Thermal Radiator Elements — V. S. V. Rajan 702
H_2S Promoted Oxidative Dehydrogenation of Ethane — N. J. Gaspar and I. S. Pasternak 248
Practical Method For Discriminating Among Mechanistic Models. A — Thomas Hsiang and Park M. Reilly 865
Precipitate Flotation: A Preliminary Study of the Underlying Mechanism — K. S. Kalman and G. A. Ratcliff 626

Prediction of Effective Axial Dispersion in Transitional and Turbulent Flow — J. R. Woodhead, E. T. White, and D. Yesberg 695
Prediction of Excess Free Energies by a Group Solution Model with Application to Alkane/Ketone Mixtures — V. C. Maripuri and G. A. Ratcliff 375
Prediction of Excess Free Energies of Liquid Mixtures Containing Aromatic Hydrocarbons using a Group Solution Model — V. C. Maripuri and G. A. Ratcliff 506
Prediction of Excess Free Energies of Liquid Mixtures by an Analytical Group Solution Model — M. Ronc and G. A. Ratcliff 825
Prediction of Gas Solubilities and Phase Equilibria of Normal Fluid Mixtures with One Supercritical Component — Chu Hsi and Benjamin C.-Y. Lu 134
Prediction of Heats of Mixing by a Group Solution Model with Application to Alkane/Alcohol Mixtures — T. H. Nguyen and G. A. Ratcliff 120
Prediction of Heats of Mixing of Liquid Mixtures Containing Aliphatic Hydrocarbons and Ketones by a Group Solution Model (note) — T. H. Nguyen and G. A. Ratcliff 889
Prediction of the Viscosities of Liquid Mixtures by a Group Solution Model — G. A. Ratcliff and M. A. Khan 125
Preparation of Amorphous Silica — N. A. Funnell, A. F. Sirianni and I. E. Puddington 541
Principle of Equivalent States for Liquid Transport Properties, A — Harry T. Cullinan, Jr. 130
Principle of Equivalent States for Transport Properties of Multicomponent Liquid Systems, A — Harry T. Cullinan, Jr. 632
Properties of n-Butylraldehyde under High Pressure Viscosity and Compressibility Determination (note) — K. K. Rungta, R. A. Stager and G. P. Mathur 886
Properties of the N-Methyl-2-Pyrrolidinone-Water System — Digby D. Macdonald, D. Dunay, G. Hanlon and J. B. Hyne 420
Rates of Reaction of SO_2 with Metal Oxides — David W. DeBerry and Karl J. Sladek 781
Reduction of Ferrous Chloride with Hydrogen. The — V. R. R. Miriyala and J. H. Bowen 804
Reduction de l'oxyde de nickel par l'hydrogène, La — F. Chiesa et M. Rigaud 617
Regional Stability for a Tubular Reactor with Axial Mixing — F. S. Wang and D. D. Perlmutter 274
Removal of Organic Sulphur from Coal Gas — S. P. Bhatia 605
Residence Time Distributions in Short Tubular Vessels — S. Veeraraghavan and P. L. Silveston 346
Residence Time Distributions of a Series of Laminar Stages — Jaime Antonio Maymo 691
Reversed Two-Environment Model for Micromixing in a Continuous Flow Reactor, A — Michael S. K. Chen and L. T. Fan 704
Selectivity Method for Modelling the Kinetics of Pentene-2-Hydrogenation, A — M. S. Rao, R. R. Hudgins, P. M. Reilly and P. L. Silveston 354
Separation of Micron-Size Particles from Air by Diffusiophoresis, The — A. Meisen, A. J. Bobkowicz, N. E. Cooke, and E. J. Farkas 449
Silica Gel-Water Vapor Sorption Therm, the — Stanley H. Jury and Harold R. Edwards 663
Simplified Form of Holland's Equations in the Solution of Multicolumn Distillation Systems, A — D. S. Billingsley 672
Simulation of the Transient Behavior of Complex Chemical Plants Using a Modular Approach — S. Bobrow, A. I. Johnson and J. W. Ponton 391
Single Bubble Formation at Orifices Submerged in Viscous Liquids — Richard D. Swope 169
Some Implications of Eyring's Theory on The Diffusion of Large Molecules (note) — M. A. Lusis 880
Sound Emission from Boiling on a Submerged Wire — C. P. Haigh and A. B. Ponter 309
Spectral Density of the Multiple Pulse, The — H. Littmann and A. Leung 166
Stability of Chemical Reactors in the Presence of Sustained Disturbances — Dale E. Seborg 535
Surface Rheological Properties of Polymer-Surface Active Agent Solutions — J. Vocel and J. T. Ryan 425
Temperature Coefficient of Gas Solubility for Regular Solutions — W. Hayduk and W. D. Buckley 667
Theoretical Interpretation of Gas Oil Conversion Data on an X-Sieve Catalyst — R. A. Pachovsky and B. W. Wojciechowski 365
Thermophoretic Acceleration of Particle Deposition from Laminar Air Streams — G. D. Fulford, M. Moo-Young and M. Babu 553
Time Dependent Rheology of Artificial Slurries — J. P. Brown and K. L. Pinder 38
Transient Natural Convection in a Porous Material — Steven M. Slater and Lawrence B. Evans 163
Transport of Solids by Gas-Liquid Mixtures in Horizontal Pipes — D. S. Scott and P. K. Rao 302
Trays for Gas-Liquid Contacting — J. D. Kilgallon and W. F. Furter 792
Turbulent Transport Model with Emphasis on Heat Transfer to Liquid Metals, A — Lindon C. Thomas 326
Two-Phase Slug Flow in Horizontal and Inclined Tubes — L. R. Vermeulen and J. T. Ryan 195
Unsteady Heat Transfer for Turbulent Flow in Tubes (note) Benjamin T. F. Chung, and Lindon C. Thomas 877
Use of Mean Hydraulic Radius in Characetrizing the Pressure Drop in Packed Beds, The — Jean-Pierre Jacks and Robert P. Merrill 699
Vapor-Liquid Equilibria in the Argon-Methane system — Denis Gravelle and Benjamin C.-Y. Lu 144
Vapor-Liquid Equilibria in the Methane-Ethylene-Ethane System — Chu Hsi and Benjamin C.-Y. Lu 140
Vapor-Liquid Equilibrium by the Method of Total Pressure Measurement — D. C. Minh and M. Ruel 159
Velocity and Temperature Profiles in Compressible Turbulent Wall Jets — John Vlachopoulos 44
Vertically Oscillating Sphere Viscometer, A — H. S. Ray and A. K. Biswas 297
Viscous Flow Through Particle Assemblages at Intermediate Reynolds Numbers — A Cell Model for Transport in Bubble Swarms — B. P. Leclair and A. E. Hamielec 713
Volumetric Behavior of the Ethane-Hydrogen Sulphide System — K. K. Tiwari and D. B. Robinson 637
Waste Water Treatment by Solvent Extraction — P. R. Kiezyk and D. Mackay 747
White's Method of Thermodynamic Calculations Applied to Ammoxidation of Propylene K. Suryanarayana, P. S. Murti and P. J. Reddy 369
Withdrawal of Cylinders from Non-Newtonian Fluids — Subhash C. Roy 583

INDEX OF AUTHORS

Auns, Janis and Talbot, Frank D. — Direct Digital Multiplicative Control of a Double-Pipe Heat Exchanger 892
